Willing to relocate: Anywhere

Personal Details

Driver's License: B
Eligible to work in the UK: Yes
Highest Level of Education: Bachelor's
Industry: Software Development

Work Experience

Warehouse Operative
Amazon.com - Rugeley
April 2016 to Present

Outbound

I was involved in this process on the first three years since I joined the team. Here, I learned how to process customer orders while maintaining the highest standards of operations and delivering upon customers' expectation.
Dedicated and reliable, I completed several trainings on the Outbound department, where I joined the packing team as a support associate.
In time, I joined the off task team, where we must provide necessary tools to the pickers in order to make sure they will process the orders in time.

Inbound

The main responsibility is to store the received products on designed warehouse areas. One of the main responsibility is to check the products appearance and report any damage item.
By joining the cart runner process, I learned to work in a friendly team environment, where I must support the main buffers with ready to go products. A good attention to details is required here, because all the products must be sorted and arranged on individual trolleys.

Chef
Vanity Bucharest - București, Ilfov
April 2013 to February 2016
